

Instructions

Your new 'Serpent' Mini-Diver was designed exclusively to be used with light tackle and smaller or low drag lures.

1-Attach your 'Serpent' Mini-Diver to your rod line (Image right).

2- Use a 2-4' leader between your 'Serpent' Mini-Diver and lure.
(Make sure to use a swivel somewhere in the leader)

3- There are a few factors that determine how deep your 'Serpent' Mini-Diver will run.

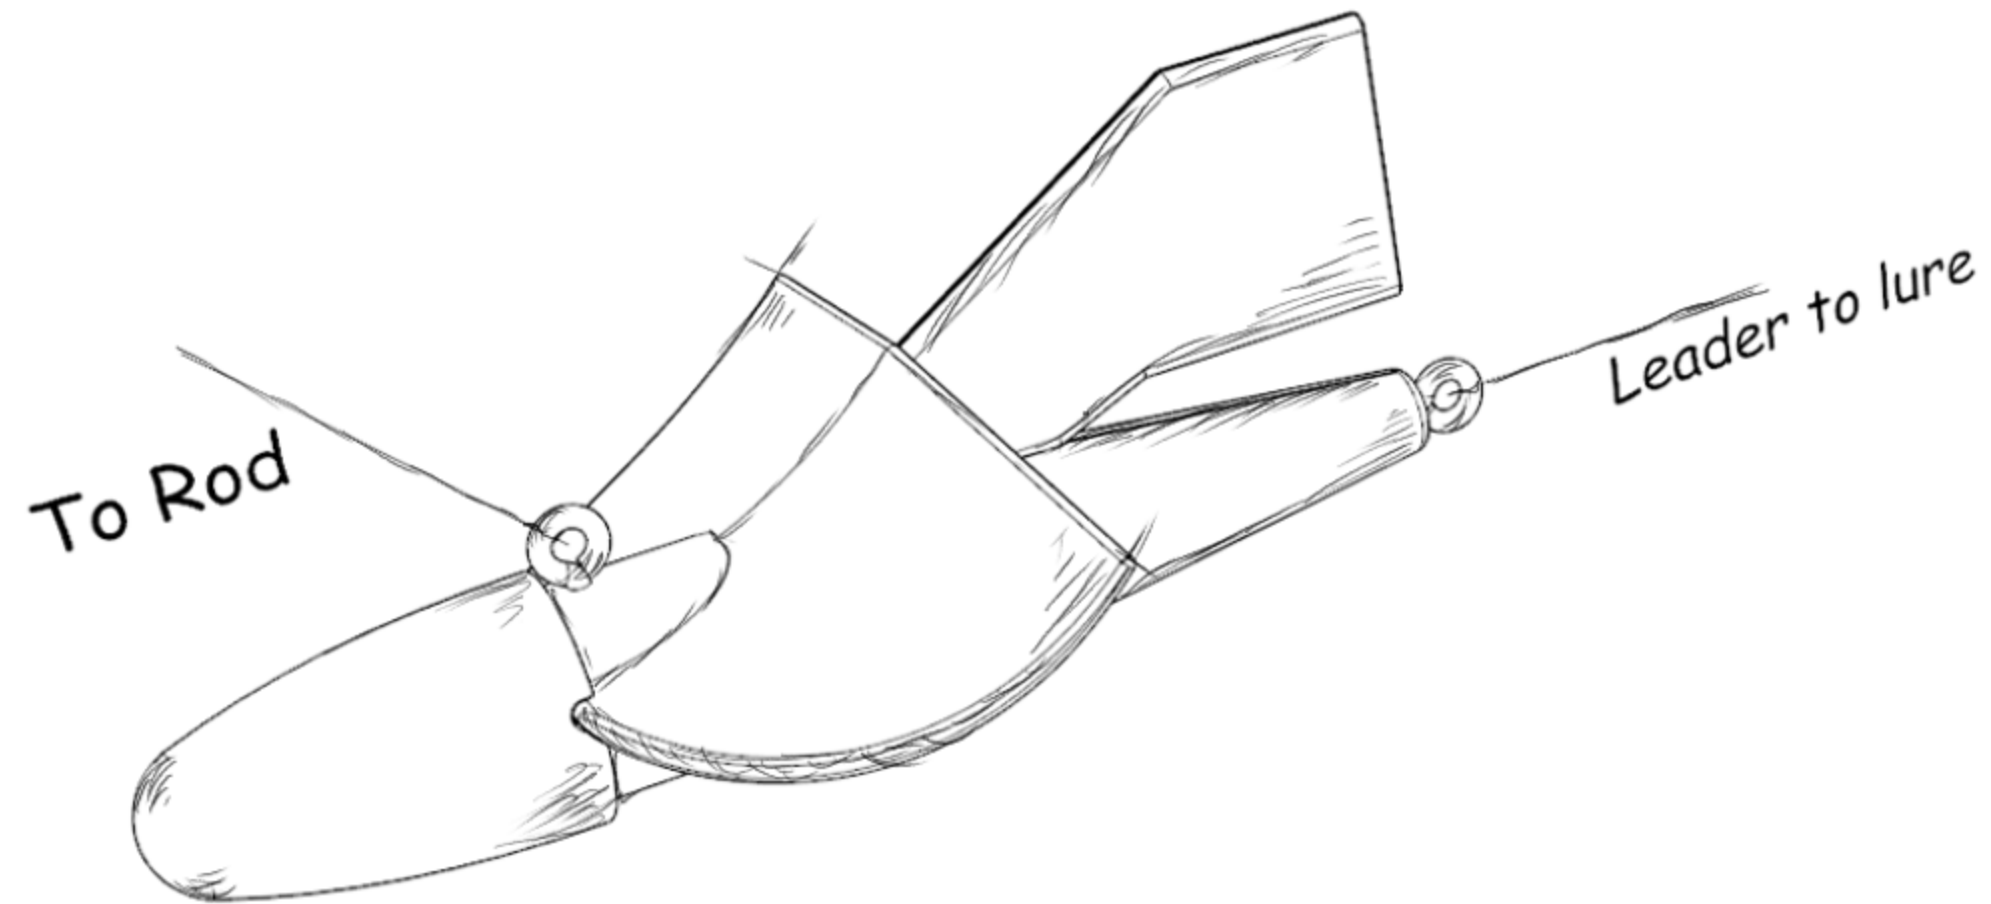

a- Line diameter, smaller diameters run deeper, hydrophobic braids tend to run shallower.

b- Lure drag, lures that pull hard will run shallower.

c- Trolling speed, trolling between 1-3.5 mph will yield the best results

Check our 'Products and Projects' page for a detailed video.
